## 2. Policy statement

Securatex Ltd recognises its responsibility to protect the environment and to reduce the environmental impacts associated with the delivery of our security services. We are committed to operating responsibly, meeting our compliance obligations, and continually improving our environmental performance through a structured Environmental Management System (EMS) aligned to ISO 14001 and integrated within our wider IMS.

Our environmental approach is proportionate to the nature of our activities, which can involve travel, on-site operations, use of equipment and consumables, and engagement with suppliers and subcontractors.

## 3. Scope

This policy applies to all Securatex Ltd activities, services and locations, including:

- manned guarding and site security operations;
- event security and venue-based deployments;
- close protection operations and associated travel;
- office-based activities and administrative functions;
- procurement, subcontractor engagement, and supply chain activity where Securatex Ltd can influence outcomes.

## 4. Our environmental commitments

Securatex Ltd commits to:

Securatex Ltd is registered in England and Wales. Company No. 16819007.  
Registered Office: 172 Stanley Green Road, Poole, Dorset, England, BH15 3AH

#### 4.1 Compliance obligations

- Identify and comply with applicable environmental legislation, regulations, and other compliance obligations relevant to our operations.
- Maintain an internal process to monitor changes in applicable requirements and ensure ongoing compliance.

#### 4.2 Protection of the environment

- Prevent pollution and minimise environmental harm arising from our activities.
- Manage waste responsibly, prioritising reduction, reuse and recycling where practicable.
- Control and minimise the use of hazardous substances where applicable and ensure safe handling and disposal arrangements.

#### 4.3 Efficient use of resources

- Reduce unnecessary consumption of energy, fuel, materials and water where we can reasonably influence usage.
- Promote efficient travel planning and sensible vehicle use to reduce emissions and cost.

#### 4.4 Environmental risk-based thinking

- Identify our significant environmental aspects and impacts and implement appropriate controls.
- Consider environmental risks and opportunities when planning operations, procuring goods/services, and selecting subcontractors.

#### 4.5 Continual improvement

- Set measurable environmental objectives and monitor performance against them.
- Investigate environmental incidents/near misses and implement corrective actions to prevent recurrence.
- Review our EMS regularly to drive improvement and demonstrate ongoing suitability and effectiveness.

### 5. Environmental objectives and performance measurement

This policy is supported by measurable environmental objectives reviewed through management review.

Objectives will be proportionate and may include:

- reducing waste generation and increasing recycling rates;
- reducing unnecessary travel and associated fuel use (e.g., improved route planning, reduced idling);
- improving procurement choices (e.g., consumables and uniform sourcing where feasible);
- improving environmental awareness and compliance through training and communication.

Objectives, targets, and performance measures are maintained within the EMS and reviewed periodically.

### 6. Operational controls

Where applicable to the services being delivered, Securatex Ltd will implement appropriate operational controls, which may include:

- waste segregation and responsible disposal arrangements at sites and events;
- spill prevention and response arrangements where relevant;
- control of consumables and minimisation of single-use materials where practicable;
- travel planning principles to reduce emissions while maintaining service integrity;
- contractor/subcontractor requirements to support environmental controls and client/site rules.

---

## 7. Competence, training and awareness

Securatex Ltd will ensure personnel are aware of:

- this Environmental Policy and their responsibilities;
- relevant environmental controls for their role and deployment environment;
- how to report environmental incidents or concerns.

Training and awareness will be delivered proportionately, including induction and refresher communications.

## 8. Contractor and supplier expectations

We will use our influence to encourage responsible environmental practices within our supply chain by:

- considering environmental factors in procurement where appropriate;
- communicating relevant environmental expectations to subcontractors and suppliers;
- monitoring and addressing poor environmental performance where it creates risk or non-compliance.

## 9. Incident reporting and corrective action

Environmental incidents, near misses, or non-compliance concerns must be reported promptly through our internal reporting channels. We will:

- investigate proportionately to identify root cause;
- implement corrective actions and verify effectiveness;
- record outcomes and drive improvements to prevent recurrence.

---

## 10. Monitoring, audit and management review

Environmental performance and EMS effectiveness will be evaluated through:

- monitoring of objectives and operational controls;
- incident and trend analysis;
- internal audits;

- management review, including the adequacy of resources, compliance status, and improvement opportunities.

---

## 11. Communication and availability

This Environmental Policy will be:

- communicated to all personnel;
- available to clients and other interested parties on request;
- published on the Securatex Ltd website.

---

## 12. Review

This policy will be reviewed at least annually, and sooner if triggered by:

- significant environmental incidents or trends;
- changes in legislation or compliance obligations;
- changes to services, scale, or operational footprint;
- audit findings requiring improvement.
